

## **VISION AND VALUES STATEMENT**

### **VISION**

To responsibly unlock the mineral potential of the Mt Egerton project and beyond, creating long-term value through exploration, development, and production that respects people, place, and the planet.

### **PURPOSE**

Our Company's purpose is to explore and develop high-grade gold resources at Mt Egerton in a responsible and transparent way, embedding strong environmental, social and governance practices from the outset.

### **VALUES**

At Black Horse Mining, we believe that responsible gold exploration, development, and production requires collaboration, transparency, and a deep respect for the land and communities where we operate. Our values guide every stage of our journey, from early-stage exploration to future development and production.

Our guiding principles are:

- a) safe and supportive working environment where our team can operate confidently and grow both personally and professionally.
- b) Low-impact exploration methods that protect biodiversity and minimise environmental disturbance.
- c) Long-term value creation through shared benefits with local communities, Traditional Owners, and stakeholders.
- d) A preference for working with local suppliers and service providers to support regional economic development.
- e) Clear and transparent communication with stakeholders, grounded in honesty, accountability, and trust.

We are committed to embedding these values into every aspect of our operations as we explore the high-grade gold potential of Mt Egerton. Our aim is to ensure that the legacy we leave is one of integrity, environmental care, and community benefit.
